

# Packing Instructions Dry ice 904

## Från IATA Dangerous Goods Regulations 2004.

### Packing instruction 904

State Variations: USG-13  
Operator Variations: HP-02, IC-08, VN-11

The General Packing Requirements of Subsection 5.0.2 must also be met.

Carbon dioxide, solid (dry ice), when offered for transport by air, must be in packaging designed and constructed to permit the release of carbon dioxide gas and to prevent a build-up of pressure that could rupture the packaging.

The net weight of the Carbon dioxide, solid (dry ice) must be marked on the outside of the package.

Arrangements between shipper and operator(s) must be made for each shipment, to ensure ventilation safety procedures are followed. The Shipper's Declaration requirements of Subsections 8.1 and 10.8.1 are only applicable when the Carbon dioxide, solid (dry ice) is used as a refrigerant for dangerous goods that require a Shipper's Declaration. When a Shipper's Declaration is not required, the information as required by 8.2.3 for the Carbon dioxide, solid (dry ice) must be contained in the "Nature and Quantity of Goods" box on the air waybill, excluding the packing instruction number and packing group.

Note 1: Refer to the relevant airline's loading procedures for Carbon dioxide, solid (dry ice) limitations.

Note 2: For Air Waybill requirements see 8.2.3. For loading instructions see 9.3.12.

Note 3: For cooling purposes, an overpack may contain Carbon dioxide, solid (dry ice), provided that the overpack meets the requirements of Packing instruction 904.
